JOB PURPOSE			
Risk Analytics Lead Expert	Jobholders at this level may be regarded as a source of expertise and are responsible for developing frameworks, policies and operational plans. They also analyze complex issues, understand business needs, bring together multiple concepts and translate them into tangible actions and support to enhance performance of the function.		
Risk Analytics Supervisor	Jobholders at this level are responsible for leading work activities and working autonomously with minor direction towards predetermined long-term objectives. Jobholders oversee the implementation of operational plans and the provision of significant improvements to set policies, procedures, standards and reports. Their main operational role includes supervising monitoring process, advising on needed improvements in dashboards, and providing corrective actions and needed control measures to enhance quality of datasets.		
Risk Analytics Lead Specialist	Jobholders at this level are experienced professionals capable of conducting work with general directions. They are primarily concerned with developing solutions to challenges which require some analysis to understand and resolve, and addressing issues escalated from junior levels.		

	They undertake complex operational activities including evaluating risk assessment on approaches and techniques, following-up on customer compliance performance and assessing developed systems and models' performance to identify improvement areas and recommend needed control measures.
Risk Analytics Senior Specialist	Jobholders at this level are capable of operating with minimal supervision. They work within guidelines and procedures in order to prepare more complex, specialized or ad-hoc reports in their related field. They contribute to the completion of milestones or operational targets within the assigned functional area. They undertake operational activities including communicating developed risk reports with related stakeholders, developing insight dashboard, studying risk and compliance to related KPIs, supporting in monitoring process and providing needed support to risk team.
Risk Analytics Specialist	Jobholders at this level carry out specific tasks independently but are subject to close supervision. They research, collect and analyze information, draft reports and documents, participate in specific meetings and develop their own professional expertise. They undertake simple operational activities including developing needed reports consolidating risk evaluation and potential risky taxpayers, brokers, etc. developing appropriate KPIs to support detection of discrepancies and collecting recipient's feedback for risk reports improvement.

ROLES AND RESPONSIBILITIES
